

Mariner East: Pipeline Safety at a Glance

Your Community Is Our Community

Energy Transfer employs a comprehensive pipeline integrity program that focuses not only on safety, but also on public awareness during every phase of pipeline construction and operations. It is our top priority to ensure that the 3,000 miles of pipeline infrastructure and gathering systems we operate in Pennsylvania safely traverse our neighborhoods and communities.

We Strive to Keep Public Awareness Top of Mind

We also closely coordinate with local first responders, school districts, townships and counties in the areas where we operate. Your community is our community.

As we plan, build and operate energy infrastructure, we care first and foremost about the residents, communities and businesses surrounding our projects and rights-of-way. Safety is our culture, day in and day out — and it's one of the many ways we are #Committed2PA.

HOW DO YOU GET 2 MILLION WORK HOURS WITHOUT INJURY? IT'S A CULTURE.

— Ed Human, Operations Director, Marcus Hook Industrial Complex

24/7/365 MONITORING

of our assets through a comprehensive integrity management program that exceeds federal requirements while minimizing environmental impact
